PROFILE

Project Manager with 5+ years of experience across digital marketing, content and project management, including 3 years leading cross-functional marketing and digital projects at Harmony Digital Agency. Experienced in turning ambiguous business problems into structured programs, aligning cross-functional teams, and driving execution from scope to measurable outcomes. MBA in Marketing with a strong interest in strategic programs and business transformation.

EXPERIENCE

Project Manager — Marketing Team

Oct 2023 – Present

Harmony Digital Agency (Yektanet Group) · Tehran, Iran

- Manage a portfolio of **12+ concurrent client projects**, prioritizing work by business value, deadlines and team capacity
- Turn ambiguous client and business problems into scoped programs — defining objectives, roadmap, budget, owners and success criteria before execution starts
- **Exercise scope judgment, not just delivery:** assess whether a project should go ahead under its budget and scope — including recommending stopping an under-scoped, low-budget engagement rather than delivering it at unsustainable risk
- Allocate resources across a 10-member internal team and **35+ freelance specialists**, managing cross-functional dependencies between design, development, SEO, content and marketing
- Designed a performance-based freelancer evaluation and allocation system that **reduced external delivery costs by ~40%** and made delivery less dependent on any single person, including myself
- Replaced manual task coordination with an **AI-assisted Telegram workflow**, saving over **8 hours per week** and letting the process run without constant follow-up
- Restored trust with **9 at-risk enterprise clients** by surfacing risks early, increasing transparency and resolving delivery bottlenecks
- Delivered **76+ landing and campaign pages** for clients' lead-generation programs

AT A GLANCE

Content Marketing Specialist & UX Writer
2021 – 2023

Harmony Digital Agency (Yektanet Group) · Tehran, Iran

- Grew from intern and freelancer into a full-time role, moving from social media marketing into content marketing, copywriting and UX writing for clients across many industries
- Built content strategy for landing pages and blogs around user needs and growth goals; planned content calendars and managed freelance writers and quality control
- Analyzed performance in Google Analytics and Google Search Console and turned insights into topic priorities, keyword optimization and page improvements
- Aligned messaging with account, sales, design and development teams to improve page experience and conversion

SELECTED PROJECTS

Scoreboard
Project Manager · Football prediction & engagement platform

- Turned management's gamification direction into a working system of coins, missions and rewards that tied user engagement to sponsor and business goals
- ▲ Helped grow it from a World Cup game into an ongoing platform with **100K+ registered users**, a peak of about **7K daily active users** and **5 brand partners**

Avisheh
Project Manager · Corporate food-ordering MVP

- Framed the business problem with employees and HR managers, researched comparable models, and separated the core MVP from nice-to-haves to reach real users faster
- ▲ Coordinated design, frontend, backend and content through launch and post-launch iterations; the platform reached about **200 daily users**

Additional Projects

Snapp (1404 birthday campaign landing page) · **Domino** (full website redesign) · **Sun Star** (current website) · **Divar** (game for blind and low-vision users) · **Pakshoma** (brand website)
